List of Course Outcome according to the syllabus:

Sl. No.	Course Outcome
CO.1	Gain idea of doing successive derivatives and limits and its application in different field.
CO.2	Over all idea about complex function.
CO.3	Find limits of sequence and subsequence
CO.4	Student will get idea about series expansion of some important functions
CO.5	Knowledge of solving ordinary differential equation.
CO.6	Know the method of convergence of improper integrals and series of functions.
CO.7	Students will gain idea about mechanics & different laws of gravitation
CO.8	Students will able to solve problems on probability.
CO.9	Students will get idea about group theory and linear algebra In advance level
CO.10	Know the method of solving numerical problems using computer programming

List of Programme Outcome:

Sl. No.	Name of Programme Outcome	Description
PO.1	Disciplinary knowledge	Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study.
PO.2	Communication Skills	Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one's views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups.
PO.3	Critical thinking	Capability to apply analytic thought to a body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.
PO.4	Problem solving	Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations.
PO.5	Analytical reasoning	Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyse and synthesise data from a variety of sources; draw valid conclusions and support them with evidence and examples, and addressing opposing viewpoints.
PO.6	Research-related skills	A sense of inquiry and capability for asking relevant/ appropriate questions, problematising, synthesising and articulating; Ability to recognise cause-and-effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation.
PO.7	Cooperation/Team work	Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team.
PO.8	Scientific reasoning	Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective.

PO.10	Information/digital literacy	Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data.
PO.11	Self-directed learning	Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.
PO.12	Multicultural competence	Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.
PO.13	Moral and ethical awareness/reasoning:	Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demonstrating the ability to identify ethical issues related to one's work, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work.
PO.14	Leadership readiness/qualities	Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way
PO.15	Lifelong learning	Ability to acquire knowledge and skills, including 'learning how to learn', that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.

CO.1	The learners are familiar with combinational and sequential circuits, which are the building blocks of digital systems.
CO.2	Learners can achieve problem-solving capability using C language.
CO.3	Learners will solve problems using the C language, enriching their knowledge of programming.
CO.4	Learners will achieve basic concepts on electronic devices, such as semiconductor devices, diodes, transistors, SCR, DIAC, TRIAC, FET, JFET, MOSFET, OP-AMP, Timer, etc.
CO.5	Provides an overall idea of the internal structure of Computer Systems. Sound knowledge on Micro-operation, CPU organization, Control Unit, CPU Registers, CISC & RISC Processors, Memory, Peripherals.
CO.6	Computational Mathematics play an important role in Computer Science. This section provides knowledge on Set, Functions, Probability, Recurrences, Numerical methods, Graph Theory. Lab work to be done using C language.
CO.7	Learners will achieve knowledge on basic operating system functions, types of operating systems, how jobs are processed, deadlock managed, memory, file are managed, security is maintained, etc. Lab work will provide knowledge of shell programming in UNIX operating system.
CO.8	Theoretical concepts on Graphics Devices, Geometrical shapes formation algorithms, Transformations, Clipping, Projection, Animations.
CO.9	Concept on networking model, structure, hardware, layers, transmission, bandwidth, switching, and other networking devices. Learn to handle networking cables, connectors, hubs, switches; LAN installation & configuration; Web page designing by HTML.
CO.10	Concepts on Algorithm, analysis, design, representation, classification of problems. In lab, learners will solve different algorithms using C.
