Networking in Under Graduate Colleges - Role of An Academic Library with Special Reference to INFLIBNET

Dipanwita Sarkar

Abstract : This paper highlights networking of under graduate colleges and the role of an academic library in networking process. First this paper discuss about the role of the academic library, and the main features of academic library. How an academic library fulfill the demand of students and teachers and research scholars and binding networks between different sectors, providing service to the college and university general user its staff members, providing extended service all discussed in the paper. Next the paper briefly narrate National Networking Systems in academic libraries emphasizing on INFLIBNET. This paper highlights the network through INFLIBNET, its main features and the role in National higher education system.

Key Words : Networking, Academic Libraries, Library Network, Undergraduate Colleges, INFLIBNET.

Introduction :

We first discuss what is an academic library- an academic library is a library that is attached to an education institution and serve two complementary purposes , to support the curriculum and to support research of the faculty and students. Academic library mainly performs its services related to the academic community.

Today academic library is full of printed resources as well as digital resources. Academic libraries provides books and other printed materials and simultaneously provides access to e-

Impact of Intellectual Property Right (IPR) in The Modern Age of Digital Era with Special Reference to Photographic Material

Dipanwita Sarkar

Librarian, Maheshtala College, Calcutta University

Abstract : This paper represents at first the concept of intellectual property and the basic nature of intellectual work. Then the study is on Intellectual Property Rights, its explanation, origin, main branches and main features of Intellectual Property Rights. The paper raises the question as to, what Intellectual Property Right can do for the society and what should be the best way of using Intellectual Property Right for the benefit of the society. Next comes the subtopic of the paper: the relationship between modern age and IPR. In this context the paper concentrated on emerging issue of Internet, which pre dominates modern society in every aspect. In today's world of technological advances, with full of digital inventories, cyber world, there is a great impact on Intellectual Property Rights. The paper highlights the issue of over reproduction of material using digital media, misuse of the valued material, and also shows that with the proper implementation of legal right there is a high chance for e-business. Next this paper explains how IPR is affected in the field of photography. Over availability of photographs is becoming a genuine threat to this area. Concluding, the paper mainly express its deep thought regarding the proper implementation of legal rights. information explosion in modern age and its direction towards property right issues related to photographic material.

Keywords : Copyright, Copyright Act, Intellectual property, Intellectual Property Right, digital content, photography, Copyright of photography.

Introduction

Intellectual Property :

Simply stated that the property which comes from one's own intellectual work is called Intellectual Property. Now what is "Intellectual Work". According to Harrod Librarian's Glossary - "Intellectual Work is a

Changing Job Orientation in Library and Information Science Profession with special reference to Academic Libraries

Dipanwita Sarkar

Librarian, Maheshtala College

dipanwita.4444@gmail.com

Abstract: This paper highlights the main job description of academic librarians. With the advancement of internet, modern information communication technology the previous roles of an academic librarian continues with addition new various tasks should be performed by them. In earlier times one academic librarian have to know the library related knowledge. Today with that other specialised technical knowledge should be kept in mind. More over as an academic librarian one has to deal with academic community, which is a very sensitive portion of the society. Students in school levels, college levels, post graduate students, research scholars and faculty members all their information needs must be satisfied. So this paper analyses the changing nature of job of an academic librarian and focus on the major challenges faced by them.

Keywords: Academic library, Librarian of an academic library, Job description, ICT, Challenges in changing scenario.

Introduction:

In few years back we thought a librarian's job can be categorised in to three basic part,

- as a custodian
- as a guide
- as a traditional cataloguer and classifier and
- public relationship maintenance.

There was large number of books in the shelves, librarian select, organise books, maintain properly. Gives service to the reader, help them, assist them by reference service. When internet and Information communication technology have taken serious place, librarian's purview is no longer confined to just books. The nature of the job became flexible. The information era with its electronic facilities have imposed many

Abstract

This paper highlights the changing scenario of accumulating information by school students at present days. There is a shifting of education infrastructure from traditional one to recent times and students are getting familiar with new modern technologies. This paper discusses this change along with recent developments. A survey has been conducted on school students, their information seeking behavior and also the role of libraries in this connection. Also a comparative study has been done among the West Bengal Board and Central Board schools. Incorporation of new teaching strategies are being welcomed by schools and students' response have been analysed and registered. But this kind of technological dependency is increasing the habit of spoon feeding among students. They are becoming more and more dependent on internet based readymade information which are destroying their creative self.

Keywords : Information, Student Education, Role of libraries, Digital Environment, Educational Technologies.

1. Introduction

Education is both a basic human right and a core element of sustainable development. It is the theme of the United Nations' fourth Sustainable Development Goal, which seeks to "ensure inclusive and equitable quality education and promote lifelong learning opportunities for all." Access to the Internet is fundamental to achieving this vision for the future. Not all learning and teaching activities or events follow the standard model of reception and transmission where the lecturer stands in front of the class to transmit knowledge into a fairly passive audience of students who simply write down what they are told. Although this tried and tested teaching methodology has certainly proven its merit, it is simply not up to date anymore, students in general the audience, expect more of teachers and presenters nowadays.

Learning does not always start from the teachers, but can also be initiated by the learner in events such as exploration, procurement or documentation. Digital learning is replacing traditional educational methods more and more each day. With how rapidly classrooms are changing, it is best to discard the old one and start thinking about newer teaching and learning techniques based on digital learning tools and technologies. The inclusion of digital learning in the classrooms can vary from simply using tablets instead of paper to using elaborate software programs and equipment as opposed to the simple pen. This could entail using sites, services, programs, teaching tools, and technologies like study aids built for at home use. Even social networks and communications platforms can be used to create and manage digital assignments and agendas. Irrespective of how much technology is integrated into the classroom, digital learning has come to play a crucial role in education. But still traditional manual learning has its own place at people's heart.

2. Review of Literature

Prakasha & Muniyappa (2017) carried a study on digital literacy among students and research scholars of Faculty of Science, Bangalore University. The findings of the study shows that 75% responded expressed that they need electronic information in addition to traditional print sources. It was also clear that
